DETAILED ACTION

Election/ Restriction

Claims 1-24 are pending in this application.

Claims 1-24 directed to semiconductor device assembly are restricted as follows:

1. The claims are directed to the following patently distinct species of the claimed invention:

I/ Species I. as best as can be understood is described in claim 1 is directed to a Semiconductor device that has the magneto-resistive elements that have spinning directions of the magneto-resistive elements being perpendicular to the plurality of bit lines included in the first and second bit line groups as seen on a plan view.

II/ species II. as best as can be understood is described in claim 2 is directed to a Semiconductor device that has the magneto-resistive elements being rectangular with short sides and long sides as seen on a plan view and the long sides intersecting the plurality of bit lines included in the first and second bit line groups as seen in a plan view.

III/ species III. as best as can be understood is described in claim 3 is directed to a Semiconductor device that has the magneto-resistive elements being parallelogramic with short sides and long sides as seen on a plan view and the long sides intersecting the plurality of bit lines included in the first and second bit line groups as seen in a plan view.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2818

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
